

Determining the added value
in your listings...the affordable house!

December 14, 2016

9 AM - 11 PM

In addition to holding the GREEN designation since 2008 Jeannette Moore is also a certified EcoBroker and has served on the Board of the Florida Green Building Coalition (FGBC) since 2009, representing the Real Estate Division.

Broker/Owner of Green Florida Properties, she is one of three certified NAR GREEN Instructors in Florida.

Join Jeannette for the last of a 4-part series exploring the extra value you can add to a listing just by entering green data into the MLS fields.

As requested in the last session the “affordable house” will be the topic for this session. We will explore sourcing materials and building/retrofitting a more energy-efficient house. Bill Lazar, St Johns Housing Partnership, will be joining us to provide more insight into building the affordable house.

Call or email Lise’ at the Board office to reserve your space for the last session on 12/14/16, from 9-11 AM.
